(54) FLUID COSMETIC AND/OR DERMATOLOGICAL COMPOSITION IN WATER-IN-OIL TYPE EMULSION FORM

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a composition in a W/O emulsion form which has enough flowability to provide refreshing feeling, gives good feelings when applied and is easy to spread while maintaining the emollient characteristic of emulsion with an outside oil phase. SOLUTION: This cosmetic and/or dermatological composition containing an aqueous phase dispersed in an oil phase contain at least one silicone emulsifier, at least one branched hydrocarbon oil, at least one volatile silicone oil and at least one polyol alkyl ester. The total amount of the branched hydrocarbon oil and the volatile silicone oil accounts for at least 50 wt. % of the oil phase in the composition.
